

## **Metal Cable Management**

*Certified production processes that  
meet international quality standards.*

# Company Profile

*Where reliability meets innovation !*

# 2025

# Welcome!

*A dedicated team focused on understanding and addressing your unique needs.*

Reliable support and seamless communication throughout the process.

## Introduction

With a 97,000 sq ft production facility, we process nearly 1M tons of sheet metal each month to meet the demands of the industry. Backed by 24 years of expertise, we deliver innovative cable management solutions.

Our presence spans across Europe through a network of distributors, ensuring we remain a trusted player in the sector. From streamlining installations to enhancing every connection, we are committed to delivering seamless results and driving your operations forward.

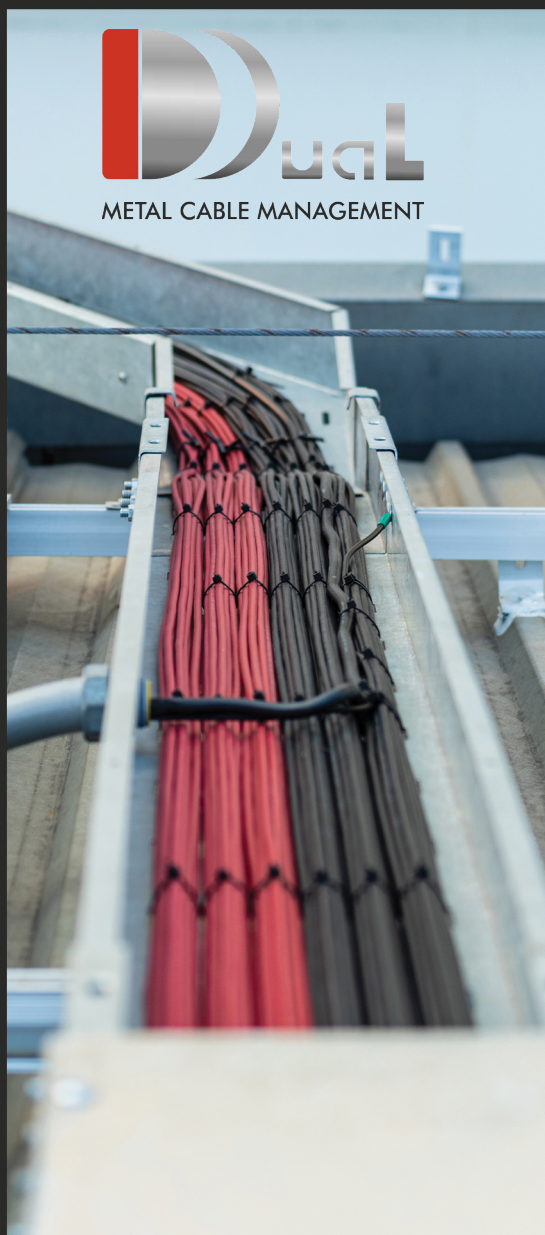

METAL CABLE MANAGEMENT

Ability to process nearly 1m tons  
of sheet metal monthly.

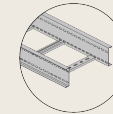

## Cable Trays

Dual Metal produces pre-galvanized cable trays designed to support and organize electrical cables in industrial and commercial settings. long-lasting performance.

## Trunkings

These systems are made from durable, corrosion-resistant materials and are available in various sizes to meet diverse project needs

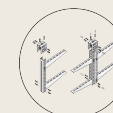

## Cable Ladder

Durable cable ladders designed to support and organize heavy-duty cables in industrial and commercial applications.

## Basket Tray

Made from durable, corrosion-resistant materials, these trays feature an open-wire design that ensures optimal airflow and prevents overheating, making them ideal for data centers, IT rooms, and sensitive environments.

## Brackets

Brackets ensure long-lasting stability and strength for cable trays, ladders, and other components. Available in various sizes and designs.

## 01. Certified Quality

Our products meet international standards like ISO, TSE, and EC.

## 02. Wide Product Range

We offer cable trays, support systems, and grounding components.

## 03. Innovation

We invest in R&D for modern and efficient technologies.

## 04. Global Experience

We are a trusted supplier with strong international market presence.

# Our Vision

We aim to be a leader in the cable management systems sector, continuously expanding its export market, adopting new technologies, and prioritizing ethical values and sustainability.

Staying at the forefront of industry trends by adopting cutting-edge technologies.

Continuously increasing its share in international markets through exports and partnerships.

## VISION

To lead the industry with innovative, sustainable cable management solutions that empower our partners, streamline their operations, and shape a more connected future for everyone.

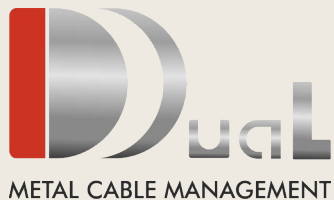

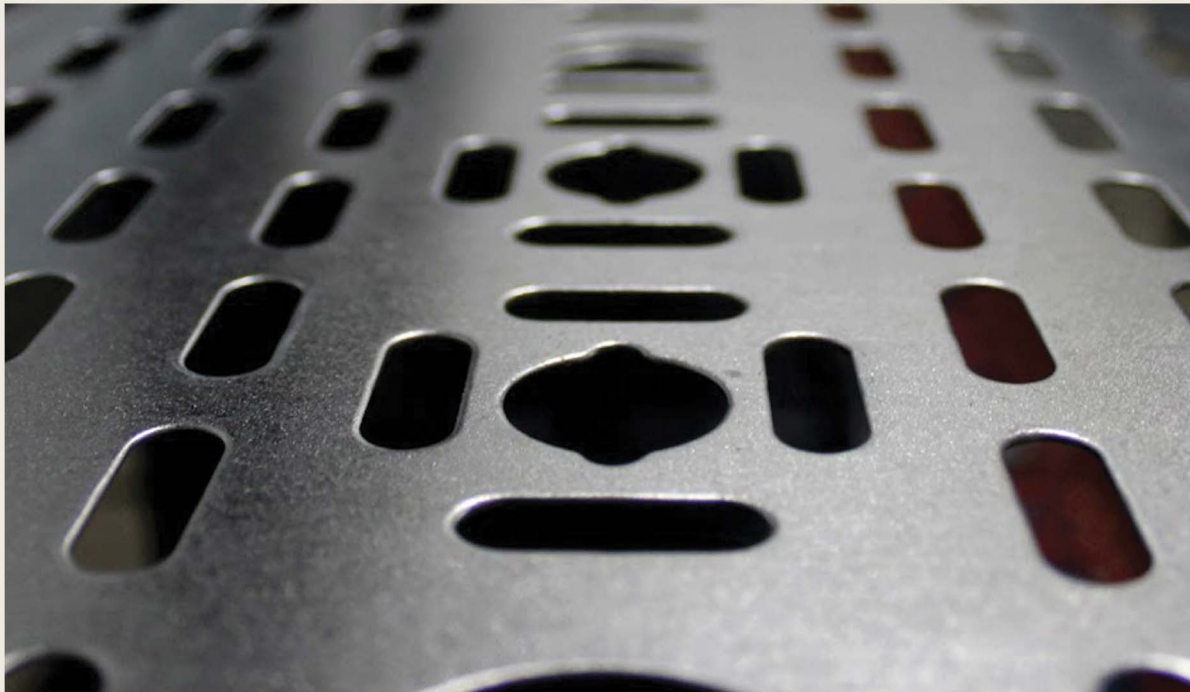

## MISSION

To become a trusted partner in the cable management industry by consistently delivering sustainable, high-quality solutions that exceed expectations.

## Future is Here

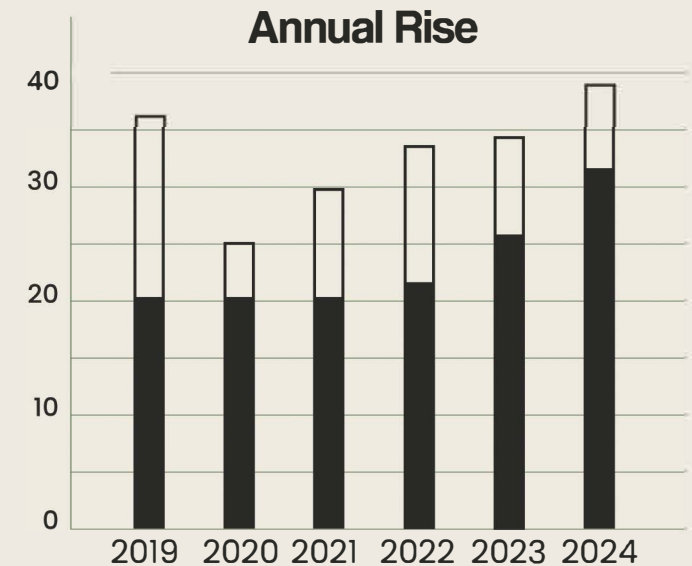

Dual Metal seeks to provide advanced and innovative solutions that cater to the evolving needs of its customers. Additionally, the company is deeply committed to sustainability, prioritizing environmentally friendly production processes and adhering to high ethical and professional standards. Through these efforts, Dual Metal envisions not only achieving long-term growth but also making a positive impact on the industry,

## Why ? Cable Management

Cable management systems are essential for ensuring an organized, safe, and efficient infrastructure. These systems help keep electrical cables neat and well-organized, reducing clutter and making maintenance tasks much easier. Proper cable management also plays a crucial role in safety, minimizing risks of accidents, fires, and ensuring compliance with safety regulations.

By protecting cables from physical damage, these systems extend the lifespan of cables, reducing the need for costly replacements. Additionally, they improve system efficiency by allowing better airflow, preventing over-heating, and ensuring optimal performance.

“

**Safety, efficiency, and scalability, ensuring a reliable and professional infrastructure.**

**High-quality, innovative cable management solutions with a focus on safety, durability, and sustainability.**

**UNIT  
6J**

# Our services

We offer a wide range of cable management solutions, including pre-galvanized cable trays, suspension systems, wire mesh trays, and grounding components. We provide custom designs to meet specific project needs, ensuring flexibility and reliability. Our services are tailored for industrial, commercial, and data center applications, focusing on high-quality products that ensure safety, durability, and efficiency.

## Data Centres

Data Center sector is rapidly evolving, creating new challenges for data center construction and cable management.

## Commercial

Dual has extensive experience in large-scale, fast-track projects. We provide tailored, high-quality solutions to efficiently complete your projects.

## Public Sector

Dual is the preferred partner for cable management systems across both private and public commercial sectors.

## Retail

We are committed to delivering high-volume products and can adapt our production and fabrication teams to align with your project timelines, ensuring efficient and timely delivery.

**“Innovation, quality,  
and sustainability in  
every solution.”**

We are dedicated to research and development, investing in advanced technologies to meet the evolving demands of its customers. It prioritizes sustainability by adopting environmentally friendly production processes and adhering to ethical business practices. Customer satisfaction is at the core of its operations, with a commitment to providing high-quality products, timely delivery, and exceptional support.

## Why Our Work

Metal cabling systems combine exceptional durability, fire resistance, and load-bearing capacity with versatility and sustainability, making them an ideal choice for reliable and efficient infrastructure in industrial, commercial, and technological applications.

**Strength, safety, and sustainability in every connection.**

Metal is fire-resistant, offering added protection in environments where safety is critical.

Suitable for various applications, from power distribution to data centers

Metal is recyclable, making it an eco-friendly choice for modern infrastructure.

## Reliability

Metal cabling systems deliver unmatched reliability, efficiency, and adaptability for any project.

## Long-Term

Metal cable trays and systems are highly resistant to physical damage, corrosion, and wear, ensuring long-term performance.

# Client feedback

Customer feedback is highly valued and plays a crucial role in driving continuous improvement across all aspects of the business. Through this commitment to excellence and a customer-centric approach, We as Dual Metal has built lasting partnerships and a strong reputation in the industry.

## TOKI

We provided durable and efficient metal cable systems for large-scale housing projects developed by the Housing Development Administration of Turkey

## Ministry of Justice

We supplied fire-resistant and secure cable management systems for Ministry of Justice buildings, prioritizing safety and compliance.

## Emlak Konut

High-quality metal cabling solutions were installed in Emlak Konut projects to ensure reliable infrastructure for modern residential and commercial buildings.

## Municipal Buildings

We delivered tailored cable tray solutions for municipal facilities, enhancing the functionality and organization of electrical systems in public spaces.

*At Dual Metal, trust is the foundation of our relationship with every customer. We are dedicated to delivering not only high-quality products but also reliable and consistent service that exceeds expectations. With internationally recognized certifications, innovative solutions, and a proven track record, we ensure that every project is handled with professionalism and care.*

**“We stand by our promise of quality and on-time delivery”**

## **Turkey Factory**
